

| | Document ID | Title |
|----|----------------------|--|
| 1 | US 20080071781 A1 | Inexact pattern searching using bitmap contained in a bitcheck command |
| 2 | US 20080071780 A1 | Search Circuit having individually selectable search engines |
| 3 | US 20080071779 A1 | Method and apparatus for managing multiple data flows in a content search system |
| 4 | US 20080071765 A1 | Regular expression searching of packet contents using dedicated search circuits |
| 5 | US 20080071757 A1 | Search engine having multiple co-processors for performing inexact pattern search operations |
| 6 | US 20080010256 A1 | ELEMENT QUERY METHOD AND SYSTEM |
| 7 | US 20070192739 A1 | Scene transitions in a zoomable user interface using a zoomable markup language |
| 8 | US 20070112714 A1 | System and method for managing knowledge |
| 9 | US 20070005624 A1 | Scalable transformation and tree based query language node - set selection |
| 10 | US 20060238540 A1 | Methods and systems for scoring multiple time-based assets and events |
| 11 | US 20060235811 A1 | System and method for mining data |
| 12 | US 20060176403 A1 | Distributed software construction for user interfaces |
| 13 | US 20060100807 A1 | Multiple calibration ranges stored in a process transmitter |
| 14 | US 20050128200 A1 | Methods and systems for scoring multiple time-based assets and events |
| 15 | US 20050035970 A1 | Methods and apparatuses for authoring declarative content for a remote platform |
